

FeneMan –
the View and
Do mission
continues ...

Boots, not suits.

You need only a little time to recognize that shop floor performance and flexibility are critical to window and door making success. And just slightly longer to realize fenestration integration can be more promise than reality.

Until FeneVision from FeneTech. Like you, we focus on what works.

FeneTech emerged from one of the leading independent process automation companies in North America. Which explains why FeneVision is the only fenestration system created by manufacturing engineers from the shop up — not the office down. And why

FeneTech is the fenestration system provider whose staff can automate and integrate every automatable process in your business.

Like you, we wear boots, not suits.

The result? A system made for how you want to make windows and doors. With more control, collaboration, flexibility and embedded fenestration knowledge. With enter-data-once use-it-everywhere door-to-door fenestration integration so powerful, we call it FeneGration. And with performance proven in dozens of window and door companies.

Discover how your company can:

- Eliminate shop paperwork and chaos
- Schedule production your way, yet make changes up until the first cut
- Check order status from any computer with secure access
- *Plus* many other benefits, including keeping your preferred accounting system

Discover the possibilities of true FeneGration with FeneVision from FeneTech. Call Ron Crowl today.

The next level in fenestration automation
